Work Experience

Mar. 2024 - Present, Fullstack Developer MeltStudio

Technologies: Next.js, React, TypeScript, Firebase, PostgreSQL, Drizzle, MySQL, CloudAMQP, iOS / Android, ShadCN UI

- Led and collaborated on 4 web/mobile projects using the Next.js ecosystem.
- Delivered apps with Firebase, PostgreSQL (Drizzle), and MySQL backends.
- Built admin/user apps (with mobile versions) in a Next.js monorepo.
- Integrated CloudAMQP and shared component libraries.
- Took technical lead on latest project, coordinating dev efforts and architecture.

Jan. 2018 - Mar. 2024, Software Developer and IT Droguería Uno A

Technologies: React, Node.js, Express.js, TypeScript, Windows networking tools

- Led the development and maintenance of internal tools and customer-facing systems using React, Node.js, and TypeScript.
- Improved system performance and data integrity through routine optimization and debugging.
- Managed IT infrastructure, including system repairs, upgrades, and data recovery strategies across the organization.

Jul. 2023 - Oct. 2023 Fullstack Developer Overnights Technologies Inc

Technologies: Node.js, Express.js, React, REST APIs, TypeScript

- Designed and developed RESTful APIs to support both mobile and desktop clients.
- Conducted code profiling and optimization to improve web app performance and scalability.
- Mentored junior developers and helped enforce coding standards and best practices.

Feb. 2022 - Dec. 2022, Frontend Developer Faceself

Technologies: React, Ionic, JavaScript, HTML/CSS

- Developed hybrid mobile applications using React and Ionic, focusing on responsive design and usability.
- Contributed to UI/UX design improvements, ensuring consistency across platforms.
- Participated in Agile sprints, collaborating with designers and backend teams.

Feb. 2022 - Dec. 2022, Fullstack Developer CheeeseOkay

Technologies: Angular, TypeScript, Node.js, Sequelize

- Built modular frontend components in Angular using TypeScript for a real-time social platform.
- Created scalable backend services with Node.js and Sequelize, improving overall system reliability.
- Maintained code quality through unit testing and continuous integration.

Jun. 2020 - Nov. 2020, Fullstack Developer Startup project Doc.tors

Technologies: Express.js, TypeScript, Flutter, Dart

- Developed REST APIs and business logic using Express.js and TypeScript for a health-tech platform.
- Created mobile app prototypes using Flutter to demonstrate core features and attract early-stage investors.
- Participated in ideation and MVP planning to align technical feasibility with business goals.
