Professional Summary

Full-Stack Developer with 8+ years of experience architecting and shipping production-grade web and mobile applications. Deep expertise in the React/Next.js ecosystem, with hands-on experience leading monorepo development, designing real-time data pipelines (Redis, MQTT, SSE), and owning CI/CD automation. Proven track record delivering end-to-end SaaS products independently and leading small engineering teams. Available for remote roles.

Key Achievements

- Architected and solo-shipped a production SaaS (Innovation Befine) – full-stack Next.js App Router monorepo with RBAC, real-time cashier dashboard, three-model payroll engine, PWA offline queue, and CI/CD pipeline.
- Delivered 4 full-stack client projects at Melt Studio inside the Next.js ecosystem, consistently meeting deadlines and client requirements.
- Automated Android & iOS release pipelines via GitHub Actions, reducing deployment time by **30%**.
- Implemented Redis caching and MQTT orchestration for IoT device-to-database data flow at Melt Studio.
- Resolved database collation and index issues, improving query reliability across multi-tenant systems.
- Maintained internal dev tooling at Droguería Uno A alongside IT infrastructure management for a small company.
- Mentored junior developers, raising code quality and team throughput across multiple engagements.

Professional Experience

Melt Studio

Mar 2024 – Present

Full-Stack Developer — Remote, Colombia

- **Architected and delivered** 4 scalable web/mobile solutions within the **Next.js App Router** ecosystem.
- **Built and maintained** a Turborepo monorepo housing admin, user, and mobile app targets.
- **Implemented** Redis caching layers and **orchestrated MQTT pipelines** for real-time device-to-database data ingestion.
- **Designed and optimized** PostgreSQL schemas and views, resolving collation issues and boosting query efficiency.
- **Automated** Android/iOS release pipelines via **GitHub Actions CI/CD**, cutting release time by 30%.
- **Led architecture design**, coordinated sprint tasks, and enforced coding standards and review practices.

Droguería Uno A

Jan 2018 – Mar 2024

Software Developer / IT Manager — Hybrid, Colombia

- **Engineered and maintained** internal tooling using **React, Node.js, and TypeScript**.
- **Resolved** database collation and index issues, improving query reliability across multi-tenant systems.
- **Managed** IT infrastructure for a small company alongside development work.

Overnights Technologies Inc

Jul 2023 – Oct 2023

Full-Stack Developer — Remote

- **Designed and optimized** scalable **RESTful APIs** supporting cross-platform web and mobile clients.
- **Profiled and tuned** backend services, reducing API latency and improving horizontal scalability.
- **Mentored** junior developers on testing practices, Git workflows, and structured code review.

Faceself

Feb 2022 – Dec 2022

Mobile Developer — Remote

- **Built** a cross-platform iOS/Android wellness app with 20+ screens using **React + Ionic + Capacitor**.
- **Implemented** JWT auth flow, **Chart.js** analytics dashboard, and profile management screens.
- **Added** offline support via **Workbox** service worker and integrated Redux Toolkit for state management.

CheeseOkay

Feb 2022 – Dec 2022

Full-Stack Developer — Remote

- **Migrated** legacy Angular codebase to **Angular 12 LTS**, enabling **PWA support via Ionic + Capacitor**.
- **Delivered** hybrid mobile apps with React + Ionic, maintaining consistent UX across web and native targets.
- **Contributed** to Agile sprints – planning, refinement, and on-time delivery.

Startup Doc.tors

Jun 2020 – Nov 2020

Full-Stack Developer — Remote

- **Implemented REST APIs** and business logic with **Express.js + TypeScript**, streamlining MVP backend processes.
- **Prototyped** cross-platform mobile app in **Flutter**, enabling early-stage investor demos.
- **Collaborated** on MVP scoping, aligning technical feasibility with business objectives.

Education

UNIR – Universidad Internacional de La Rioja	2025
Master’s Degree in Software Engineering	
Universidad del Norte	2022
Bachelor’s Degree in Systems and Computer Engineering	

Technical Skills

Frontend: React, Next.js (App Router, Server Actions, RSC), Angular, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS, shadcn/ui, RadixUI, MUI, Sass, PWA
Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, tRPC (basic), Server-Sent Events (SSE), MQTT, Redis
Databases: PostgreSQL (Neon), MySQL, Drizzle ORM, Sequelize, Redis
Mobile: Ionic, Capacitor, Flutter (basic), React Native (basic)
DevOps & Cloud: GitHub Actions, Docker, Vercel, Firebase, AWS (basic), GCP (basic)
Testing: Vitest, Playwright, Jest, Cypress, @axe-core/playwright (a11y)
Tooling: Turborepo, Drizzle Kit, Better Auth, React Hook Form, Zod, next-intl
Practices: Agile/Scrum, Monorepo Architecture, RBAC, CI/CD, Code Review, Mentorship

Certifications

- Frontend Developer (React) – HackerRank
- JavaScript (Intermediate) – HackerRank *(Sep 2025)*
- JavaScript (Basic) – HackerRank *(Sep 2025)*
- Learn to Code with Ruby – Udemy
- Business Process Modeling – Avaya
- SmallTalk English Speaking Test

Languages

Spanish – Native | English – Advanced (C1)
